Commissioner Henney,

I have read many articles on the use of antibiotics on the farm, and have become very concerned. We need to ban the use of antibiotics commonly used in people, or closely related to those used in people, including bacitracin. We need to join Europe in banning bacitracin, penicillin and tetracycline. It should not take years to get this ban going. We need this ban to start NOW! DON'T WAIT TO LONG! Not only do we need your help, but our children and grand children need your help, PLEASE!

Thank you,

Jennie I Rembold
